

Job Title/Department - Additive Manufacturing Technician/Post-Processing and Dispatch

Salary – £23,000.00

Office Location – London (North East), United Kingdom

Remote Work and Hours - No, on-site job role. Monday - Friday, 09:00 - 17:00

Key Skills – 3D Printing, Additive Manufacturing, Post-Processing

How to Apply - Please send CV and Cover Letter to careers@3dprint-uk.co.uk

3DPRINTUK is one of Europe's fastest growing companies with continual growth projected this year; we are one of the best-known names for Powder-Based Fusion additive manufacturing with a strong reputation for delivering prototypes and high quantity end-use products to the highest of standards.

Successful candidates would be joining a fast-paced environment focusing on automated post-processing and dispatching orders within set lead times. Individuals will need to work to short deadlines which form a part of the daily work pattern, whilst sorting and processing thousands of parts per day keeps things varied and interesting. This role is a great opportunity for those looking to start their professional career in Additive Manufacturing, giving them a wide knowledge of industry printers and finishing techniques and opportunities to work closely with other departments within the company.

Main Duties include but are not limited to

- Sort and prioritise orders through their appropriate post-processing stages
- Working with and operating post-processing machinery
- Dispatch of orders, working with various logistical methods

Personal Qualities

- Organised and tidy
- An interest in 3D printing
- Works well as part of a close team
- Good eye for detail
- Technically minded
- Creative Thinker

Experience required

- To be able to work with 3D CAD viewers.
- Basic computer skills including Microsoft Office
- Experience with Additive Manufacturing in personal or professional environments
