How to Apply - Please send CV and Cover Letter to careers@3dprint-uk.co.uk

3DPRINTUK is one of Europe's fastest growing companies with continual growth projected this year; we are one of the best-known names for Powder-Based Fusion additive manufacturing with a strong reputation for delivering prototypes and high quantity end-use products to the highest of standards.

The Additive Manufacturing Production Technician is a junior position that provides support to all members of the build team ensuring that the flow of production stays consistent ultimately allowing orders to be fulfilled. The successful individual will need to be able to work to strict deadlines and ensure that the highest standards are adhered to at each stage of the production process.

Main Duties include but are not limited to

- Minor cleaning/maintenance, printer set-up and job turnarounds
- Basic troubleshooting for machines used in the manufacturing process
- 3D file fixing of client data
- Creating and sending jobs for printers

Personal Qualities

Technical Knowledge

- Basic understanding of mechanical processes
- Ability to problem solve

Personal Qualities

- Willing to learn new techniques and adapt to situations with new information
- Good communication skills both within the department and company wide
- Strong attention to detail

Experience required

- To be able to work with 3D CAD viewers.
- Basic computer skills including Microsoft Office
- Experience with Additive Manufacturing in personal or professional environments.
